SEIZURE ACTION PLAN 2024-2025 SCHOOL YEAR

MEDICATION GUIDELINES

The administration of medication to students shall be done only in exceptional circumstances where the student's health may be jeopardized without it. Whenever possible, administration of medication should be done at home. (Medication prescribed three times per day can be given before school, after school, and at bedtime.) If a new medication is started, the first dose must be given at home, unless it is a rescue medication.

The school will adhere to the following guidelines as it pertains to medication:

- 1) Administration of prescription medication by school personnel must only be done according to the written order of a licensed prescriber and written authorization of parent / guardian and Licensed School Nurse, regardless of the student's age.
 - Mixed dosages in a single container will not be accepted for administration at school.
 - If a half tablet is required for a correct dosage, it is the parent's / guardian's responsibility to provide pre-cut tablets for administration at school.
 - Altered forms of medication will not be accepted or administered at school.
 - Narcotics / medical cannabis will not be administered at school.
 - Aspirin-containing products will not be administered at school.
- 2) All medication (prescription and non-prescription) must be brought to and from school by a parent / guardian in its original container. The following information must be on the prescribed container label:
 - Student's full name
 - · Name and dosage of medication
 - · Time and directions for administration at school
 - Physician / licensed prescriber's name
 - Date (must be current)
- 3) New consent from a licensed health care provider and parent / guardian signatures must be received each school year.
- 4) A new medication consent form is required when the medication dosage or time of administration is changed.
- 5) When a long-term daily medication is stopped, a licensed prescriber's order is requested.
